Fig. 2 Effect of volume of extraction solvent on enrichment factor. Conditions: extraction solvent, cyclohexane; dispersion solvent, 0.5 mL acetone; no salt addition; extraction time, 1 min; pH of standard solution, 12; concentration of anilines, $20 \mu\text{g L}^{-1}$

Fig. 4 Effect of volume of dispersion solvent on enrichment factor. Conditions: extraction solvent, 15 μL cyclohexane; dispersion solvent, ethanol; no salt addition; extraction time, 1 min; pH of standard solution, 12; concentration of anilines, $20 \mu\text{g L}^{-1}$
