Erratum to: Exp Brain Res (2012) 222:303–320
DOI 10.1007/s00221-012-3217-2

It has been brought to the attention of the authors that they inadvertently included an incorrect citation in their paper. On pp. 307–308, the paper should have cited (Soyka, personal communication) instead of (Soyka et al. 2012) for the following statement: “The log can also be justified since for some cost functions this more evenly emphasizes all frequencies independent of whether the calculations are done using velocity, acceleration, or displacement as the input”.
