Erratum to: Exp Brain Res (2017) 235:293–304 DOI [10.1007/s00221-016-4790-6](https://doi.org/10.1007/s00221-016-4790-6)

There was an error in Eq. (4) as it was originally published. Equation (4) should read as follows:

$$\text{COG}_y = \text{COP}_y - \frac{I}{mgh} (a_{y1} - a_{y2}) \quad (4)$$

where COG_y is the antero-posterior location of the COG, COP_y is the antero-posterior location of the COP, g is acceleration due to gravity, a_{y1} is F_{y1}/m_1 , and a_{y2} is F_{y2}/m_2 . F_{y1} is the antero-posterior shear force recorded from the force

plate upon which the participant stood, m_1 is the mass of the participant plus the mass of the force plate upon which the participant stood, F_{y2} is the antero-posterior shear force recorded by an empty force plate on the motion platform, and m_2 is the mass of the empty force plate on the motion platform. Thus, the term $(a_{y1} - a_{y2})$ is acceleration of the participants' COG relative to the moving platform.

The online version of the original article can be found under doi:[10.1007/s00221-016-4790-6](https://doi.org/10.1007/s00221-016-4790-6).
