Exp Brain Res (2000) 131:144–148

On page 145, at the end of the Materials and methods section, an incorrect statement was printed to the effect that all procedures were performed in accordance with the guidelines issued by the “Tel Aviv University Animal Care and Use Committee.” Although all procedures were appropriate, this committee had not yet been established when the above study was carried out. The statement should therefore be deleted.
