At a late stage of preparation of his article, the author impetuously introduced an error into the last two sentences of Sect. 8.4, dealing with the Birget-Rhodes expansion $BR(G)$ of a group G . The maximal subgroup H described there is actually a singleton $\{(1, \{1\})\}$, and so $H^\downarrow$ is a semilattice $\{(1, e) \in G \ltimes E^f : 1 \in e\}$ —the idempotents of $BR(G)$. Of course, $BR(G)$ itself consists of all $(u, e) \in G \ltimes E^f$ such that $1, u \in e$.
