RE: Arch Environ Contam Toxicol 49: 504-510 (2005) (this issue): Corrections and changes the authors made to their Acknowledgments section were not incorporated into the final approved online and print version of this article. The Acknowledgments appear correctly below.

Acknowledgments. This work was partly supported by the Korean Ministry of Commerce, Industry and Energy through the Food In-

dustrial Technology Research Center at Mokpo National University, by CO/EU/Centers of Excellence Project CESUM-BS (Contract number ICAI-CT-2000-70031, Varna, Bulgaria) and by the Department of Analytical Chemistry constitutes Centre of Excellence, European Commission under the Fifth Frame (contract number EVK1-CT-2002-80010, Gdansk, Poland). The authors are thankful to Mrs. Elena Katrich (Hebrew University of Jerusalem, School of Pharmacy) for the technical assistance.
