The January issue is our first attempt at a general theme for most articles—a thematic issue on gastrointestinal and genitourinary radiology. It was planned before we made the decision about case reports and clinical images and, therefore, we have included a number of each in this issue. We hope you appreciate the concept of a thematic issue, and we are looking forward to having more in the future.

We have many exciting projects to look forward to this year, including a minisymposium on digital radiography, a minisymposium on molecular imaging, and

supplements on the IPR meeting, perinatal imaging, and ALARA CT.

All editors are extremely appreciative of our reviewers, and in the Acknowledgement to Referees published in this issue, we recognize their invaluable contribution to our journal. Managing Editors would also like to acknowledge the important work of our Assistant Editors. We could not do what we do without their labor and commitment.

To our readers and supporters, friends and family around the world, our best wishes for a healthy, happy and productive New Year.
