History: A 21 year old female presents with chronic shortness of breath. A chest radiograph was performed. An additional foot radiograph for foot pain was obtained two years prior to her current presentation. What underlying diagnosis is suggested by these radiographic findings to explain her presenting symptoms (Figs. 1 and 2).

The diagnosis can be found at doi: [10.1007/s00256-016-2512-6](https://doi.org/10.1007/s00256-016-2512-6)
