Erratum to: International Orthopaedics (SICOT) DOI 10.1007/s00264-007-0468-9

Through a typesetter's error during proof correction, the first sentence of the second paragraph in the Results section was rendered incorrectly. The correct sentence is as follows:

“Functionally, nine cases achieved excellent results with complete neurological recovery, 13 cases achieved good results (with subjectively non-disturbing residual sensory deficits in four cases and motor deficits in one case), seven cases had fair results with partial motor and sensory recovery but still agonising deficits and three cases had poor results with no recovery.”
