Every year since 2003, the CVIR Editorial Board has chosen publications from the previous volume for nomination of the Editors' Medal. The winners are selected by a poll among all members of the Editorial Board and include original and experimental submissions only.

We are happy to announce a continued increase in qualifying articles, reader interest, author submissions, and numerous nominations by the Editorial Board members. With this in mind, the editors have decided this year to honor two author groups for their outstanding contributions to CVIR.

It is our pleasure to give the Editors' Medal 2014 to the author groups listed below. This award comes with a considerable donation from our publisher, Springer Science+Business Media, LLC. Congratulations to all the winners, and thank you for making CVIR your preferred journal for your submissions.

Winners of the Editors' Medal 2014

1. Nicholas Chalmers, Paul T. Walker, Anna-Maria Belli, Anthony P. Thorpe, Paul S. Sidhu, Graham Robinson,

Mariella van Ransbeeck, Steven A. Fearn. Randomized Trial of the SMART Stent versus Balloon Angioplasty in Long Superficial Femoral Artery Lesions: The SUPER Study. CardioVascular and Interventional Radiology 2013, Volume 36, Issue 2, pp 353–361
