Seminar of New Educational Methods in Anatomical Sciences, Tabriz, Iran

Tabriz University of Medical Sciences, Iran, 22 and 24 July, 2009

The topics of interest are:

1. Anatomical sciences research and education
2. Clinical anatomy
3. Integrating anatomical sciences into clinical curriculum
4. Surgical embryology
5. Impact of practical courses on students' performances
6. Application of animations in anatomical sciences education
7. Anatomy learning softwares and web-based learning modules
8. Plastination
9. Evolution of anatomical sciences: history of anatomy with special reference to Islamic period.

Abstracts should be emailed to the secretary of seminar: anatomyeducation@gmail.com. Abstracts, not exceeding 350 words, should include the full name and affiliation of author(s) and address for the presenting author. Submission deadline is 21 June 2009.

Tabriz is an ancient city located in the northwest of Iran. It is said that this city was the original site of *Garden of Eden*. Rabi Rashidi, one of the largest and earliest medical

schools with classic curricula and accreditation procedure for physicians was built in Tabriz in 13th century AD; one may still see the remnant of this complex today. All interested are welcome.

"1st International Symposium of Clinical and Applied Anatomy" (ISCAA 2009)

Novi Sad, Serbia, from 17 to 19 September 2009

Full information including abstract submission, dates, etc., can be found by going to the official web site—www.iscaa2009.com.

ISCAA 2009 meeting has been accepted as an ISAKOS (International Society of Arthroscopy, Knee Surgery and Orthopaedic Sports Medicine) Approved Course (<http://www.isakos.com/meetings/default.aspx>).

Organizing Committee Co-Presidents:

Dragan Krivokuca, M.D., Ph.D.

Associate Professor of Anatomy

Mirela Eric, M.D., M.Sc.

Plastic Surgeon

Faculty of Medicine

Department of Anatomy

Hajduk Veljkova 3

21000 Novi Sad
