Erratum to: Biol Fertil Soils
DOI 10.1007/s00374-011-0646-1

The original version of this article inadvertently contained a mistake, particularly in the Abstract and Conclusion sections.

The corrected statements would now be:

Abstract: “This was the first genetic study of alfalfa rhizobia isolated from this region and also the first report of natural presence of *R. tibeticum* in root nodules of *M. sativa*.”

Conclusion: “Since this was the first study of the alfalfa rhizobial diversity in Serbia, the data obtained provide important background information for further ecological and phylogenetic studies as well as development of inoculums for higher productivity and soil fertility.”
