The text above Eq. (16) should read: “Using (4) and (5), and the scaling suggested by (6a)–(6g) we find that the dimensionless storage modulus ($\tilde{G}' = G'H^2/K_{33}$), loss modulus ($\tilde{G}'' = G''H^2/K_{33}$) and loss tangent ($\tan \delta = \tilde{G}''/\tilde{G}'$) (Burghardt 1991) are:”
The text below Eqs. (40a,b) should read: “and hence the impact of geometry is almost insignificant. For large frequencies, $U_1(\tilde{\omega}) \approx U_2(\tilde{\omega})$, for both flows”.

References: de Andrade Lima and Rey (2004a,b,c) should be located between Chandrasekhar (1992) and de Gennes and Prost (1993).
