**Erratum to: Arch Gynecol Obstet
(2009) 279:53–56
DOI 10.1007/s00404-008-0673-9**

The authors hereby declare that the original version of the article unintentionally included an illustration that is identical with one published in Li AJ, Madden AC, Cass I, Leuchter RS, Lagasse LD, Karlan BY. The prognostic significance of thrombocytosis in epithelial ovarian carcinoma. *Gynecol Oncol* 2004;92(1):211–4.

As the illustration was provided by a third party, the authors did not notice the double publication.

The raw data were re-evaluated and the results are presented in the new figure that has been provided together with this erratum.

The authors sincerely thank Dr. Alp Giray Ozen who re-evaluated the original data for this illustration. As Dr. Alp Giray Ozen received a payment for his valuable efforts, he was not included as a co-author of this paper.

Fig. 1 Kaplan–Meier analysis of overall survival in dependence of thrombocytosis
