Correction to: Int J Legal Med (2017) 131:1747–1756
<https://doi.org/10.1007/s00414-017-1659-6>

After publication of the original article, it was brought to authors' attention two errors that were included in the final publication.

- a) This error is related with a misleading terminology that was modified when article was sent to the proof-reading service. Terminologies referring to “posterior” and “ante-

rior” were inverted due to translation and transcription issues. Therefore, when authors are referring to “posterior region,” it must be replaced by “anterior region” and vice versa.

- b) After final corrections, subtitles referring to different regions of the bone were removed. However, the one that indicates the “sciatic notch” section in page 3 was accidentally included.

The authors apologize for these errors, which do not affect the findings or conclusions of the article.

The online version of the original article can be found at <https://doi.org/10.1007/s00414-017-1659-6>
