The authors wish to make the following clarifications regarding the primers used in real-time quantitative polymerase chain reaction (PCR):

The correct sequences used were: superoxide dismutase (Cu/Zn-SOD; forward: 5'-CCAGCGGATGAAGAGAGG-3', reverse: 5'-CCAATCACACCACAAGCC-3'), mitochondrial manganese superoxide dismutase (Mn-SOD; forward: 5'-GACCTGCCTTACGACTATG-3', reverse: 5'-TACTTCTCCTCGGTGACG-3'), catalase (forward: 5'-ATTGCCGTCCGATTCTCC-3', reverse: 5'-CCAGTTACCATCTTCAGTGTA G-3'), and glyceraldehyde 3-phosphate dehydrogenase (GAPDH; forward: 5'-GATGGGTGTGAACCACGAGAA-3', reverse: 5'-ACGGATACATTGGGGGTAGGA-3') as internal control.
