Unfortunately some of the corrections marked in the proof were not carried out accurately. We regret this and herewith publish the correct information.

1. The heading **1 Introduction** should precede the paragraph beginning with “Humans and several kinds of insects...” on the first page.

2. The fourth-last sentence of Sect. 2.3 *Data analysis*

The extent to which this estimate of H actually describes fractal scaling can be expressed by the fit of the regression line in terms of the proportion explained variance (S_{pe}).
