Unfortunately, in Fig. 1, labels (“EF1 γ ” and “ β -Glu”) were missing in the online published article.

The correct figure is displayed below.

Fig. 1 *VpSTS* expression in response to *Uncinula necator*. Leaves were harvested at the indicated times after *Uncinula necator* inoculation for preparation of total RNA. Accumulation of *VpSTS* and β -Glu (β -1,3 glucanase gene) transcripts was monitored by semi-quantitative RT-PCR. *EF1 γ* amplification was used as constitutive control. *VpSTS* transcript accumulation was quantified by densitometry using Bio imaging Systems software (Syngene) for two independent biological experiments ($n = 2$); each value was corrected according to the *EF1 γ* amplification signal and expressed as a ratio between the corrected value and the control time point (at 0 h) corrected value. Error bars indicate standard error of means

The online version of the original article can be found under doi:10.1007/s00425-009-1062-8.
