Furthermore, there are errors in pages three and five. On the third page, the correct formula should read:

$$M_i = \exp\left(\frac{1}{331} \sum_j \log(R_{ij})\right).$$

On the fifth page, the values in the denominator of the fractions should read:

$$\begin{aligned} \left(\frac{F_w}{176.31}\right)^{1/0.42} &= \left(\frac{P_w}{93.90}\right)^{1/0.45} = \left(\frac{O_w}{36.32}\right)^{1/0.58} = \left(\frac{T_w}{84.97}\right)^{1/0.42} \\ &= \left(\frac{F_g}{245.24}\right)^{1/0.16} = \left(\frac{P_g}{113.55}\right)^{1/0.11} = \left(\frac{O_g}{65.51}\right)^{1/0.16} = \left(\frac{T_g}{172.82}\right)^{1/0.22}. \end{aligned}$$

This modifications do not affect the results nor the figures which were obtained with the correct formula.
