

## Erratum to: Practical consensus guidelines for the management of enuresis

Johan Vande Walle · Soren Rittig · Stuart Bauer ·  
Paul Eggert · Daniela Marschall-Kehrel · Serdar Tekgul

Published online: 18 January 2013  
© Springer-Verlag Berlin Heidelberg 2013

**Erratum to: Eur J Pediatr**  
**DOI 10.1007/s00431-012-1687-7**

### Erratum 1

There is an error in the section entitled Background.

The text currently says:

‘Underlying NP associated with low overnight vasopressin levels [38], decreased urinary osmolality and poor likelihood of a desmopressin response’

This should in fact read:

‘Underlying NP associated with low overnight vasopressin levels [38], decreased urinary osmolality and high likelihood of a desmopressin response’

### Erratum 2

There is an error in the footnote relating to Template 1.

The text currently says:

‘It should be considered abnormally small or large if found to be <65 % or >150 % of expected bladder capacity (EBC), respectively [6] – see Table 2 listing EBC, reduced MVV, large MVV and NP values for 5–18 years’

This should in fact read:

‘It should be considered abnormally small or large if found to be <65 % or >150 % of expected bladder capacity (EBC), respectively [6] – see Table 3 listing EBC, reduced MVV and NP values for individuals aged 5–18 years’

### Erratum 3

There is an error in the final column title of Table 3.

The text currently says:

‘Total volume below listed value = nocturnal polyuria; consider desmopressin’

This should in fact read:

‘Total volume above listed value = nocturnal polyuria; consider desmopressin’
