ERRATUM

Erratum to: Evolutionary modularity and morphological integration in the haptor anchor structures of *Ligophorus* spp. (Monogenea: Dactylogyridae)

After online publication of this article, the authors recognized an error in the Materials and Methods section. The correct statement is shown below. The authors would like to point out that this error does not affect the interpretation of the results in the article.

“We based our morphological analysis on 286 individuals belonging to 14 valid species of *Ligophorus* for which original drawings of anchors were available: *Ligophorus acuminatus* Euzet & Suriano, 1977; *Ligophorus cephalis* Rubtsova et al., 2006; *Ligophorus chabaudi* Euzet & Suriano, 1977;

Ligophorus confusus Euzet & Suriano, 1977; *Ligophorus heteronchus* Euzet & Suriano, 1977; *Ligophorus imitans* Euzet & Suriano, 1977; *Ligophorus macrocolpos* Euzet & Suriano 1977; *Ligophorus mediterraneus* Sarabeev et al., 2005; *Ligophorus minimus* Euzet & Suriano, 1977; *Ligophorus szidati* Euzet & Suriano, 1977; *Ligophorus vanbenedenii* Euzet & Suriano, 1977; *Ligophorus llewellyni*; *Ligophorus pilengas*, and *Ligophorus angustus* Euzet & Suriano, 1977. The sample size for each species was 20 individuals for ventral and 20 individuals for dorsal anchors (not always matching specimens of the previous group), except in *L. angustus* (four ventral and two dorsal anchors). In all, 526 anchors were studied of which, in 238 instances, represented ventral and dorsal anchors of the same worm individual”.
