Oecologia (2005). DOI: 10.1007/s00442-005-0178-1

Unfortunately, Fig. 2 was published without its legend. The figure appears here with the legend.

Fig. 2 Distribution of foraging effort and movement by *C. casuarius* throughout the day. Foraging effort was derived from direct observation of wild birds; movement % is the percentage of daily movement bouts that occur in each 60 min period, derived from radio-telemetry
