Equations 9 and 9b in the paper are wrong. The correct equations are:

Equation 9:

$$\sigma = \frac{\int_x^\infty p_x l_x \, dx}{\int_x^\infty l_x \, dx} = \frac{\beta C_T}{\delta + \delta/\pi + \beta C_T}$$

Equation 9b (Table 2)

$$\sigma = \frac{\beta C_T}{\delta + \delta/\pi + \beta C_T + \delta\alpha\beta C_T/\pi}$$

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00442-005-0346-3>
