The results of regression analysis is shown where *a* denotes the intercept and *b* the slope. Comparison of regression lines was done by ANCOVA. For abbreviations of traits see Table 2. For species specific mean leaf trait values see Supplemental Table 1

Significant regressions and comparisons: ns, *, **, *** (respectively, non-significant, $P < 0.05$, $P < 0.01$, $P < 0.001$)

^a Photosynthetic units are in μmol or mmol electrons for juveniles and in μmol or mmol O₂ for adult trees
