Das „Alter“

Ein Beispiel für Frauen- konstruktionen in der Reproduktionsmedizin

Reproduktionsmedizin (2003)
19:189–194

Erster Abschnitt, letzter Satz, muss richtig heißen:

In den verschiedenen europäischen Staaten wurden 1998 zwischen 0,5 und 3,8% der lebend geborenen Kinder mit Hilfe der assistierten Reproduktion gezeugt und diese Rate erreicht 1999 einen Anteil an den Lebendgeburten von 1,7% (Nygren KG, Nyboe A (2002) Assisted reproductive technology in Europe, 1999. Results generated from European registers by ESHRE. Hum Reprod 17:3260–3274).
