1 Special Issue of Materials for modern energy applications

In honor of the 25th anniversary of the journal *Computational Mechanics*, a group of eight papers were collected for a special issue on materials for modern energy applications, specifically addressing the computational analysis of materials related to

- (1) Energy Capture,
- (2) Energy Conversion,

- (3) Energy Transmission and
- (4) Energy Storage.

We hope that this special issue provides a “snapshot” of some of the ongoing scientific activities in this emerging field of research.

Regards,
The Guest Editors.
