- In the legend of Fig. 5 the symbol K for the intensity should not be confused with the K used to designate Bessel functions in Eqs. 5 and 8 and the third line in this figure caption should read
“... $K - K_0$, where $K = 2 \sin \theta/\lambda$ and K_0 is the value of K at the exact...”
- The factor b in the first term of the r.h.s. of Eq. 8 should be replaced by by ; i.e. Eq. 8 should read

$$\varepsilon_x = -\frac{b}{4\pi(1-\nu)}y \left[\frac{(1-2\nu)r^2 + 2x^2}{r^4} \right] + \frac{b}{2\pi(1-\nu)}y [(y^2 - \nu r^2)\Phi_1 + (3x^2 - y^2)\Phi_2] \quad (8)$$
