The goal of this book is to prepare the students for the examinations: “orthopaedics in training examination” and “American board of orthopedic surgery.” This book will be also useful for the older surgeons for their re-certification. This book takes again fundamental orthopedic surgery. The various chapters show at the same time the various articulations (hip, knees, shoulder, hand...) but also of the more specific subjects like pediatry, the medicine of the sport, the amputations and rehabilitation or biomechanics and the statistics.

A book to revise its basic more particularly intended for North America.
