On page 266, the formula, which was used in Bavaria to calculate the daily mean between 1879 and 1900 was cited wrongly. Instead of $T_m = (T_8 + T_{14} + T_{20})/3$ it should read $T_m = (T_8 + T_{14} + T_{20} + T_{\min})/4$ (Erk 1883). This latter formula gives a too low daily mean. The conclusions drawn and the correction applied (Table in Section 6 and Fig. 5) are unaffected.
