Unfortunately an erroneous version of Fig. 7 had been used in the original publication. The correct version of the figure is given below:

Fig. 7 Summary of fits and simulations for model III (all mixed species inactive). **a** Sample progress curves: *circles* data points for 10 mM Mg(II), *line* prediction of experimental curve using parameters determined from the fit. *Squares* data points for 5 mM Mg(II)/250 $\equiv$ M Ca(II), *dash* prediction of experimental curve using parameters determined from the fit. *Triangles* data points for 5 mM Mg(II)/1 mM Ca(II), *dots* prediction of experimental curve using parameters determined from the fit. **b–d** Comparison of experimental (*closed squares*) and predicted k_{obs} (*open circles*) for the indicated conditions
