The original version of this article unfortunately contained the following errors:

1. The article was incorrectly categorized. The category should have been Award Review, not Review.
2. The following portrait and caption should have been included before the reference section.

We sincerely apologize for the error.

Dr. Takeshi Kajihara, of the Department of Obstetrics and Gynecology, Saitama Medical University, Saitama, is the winner of the Japanese Society for Clinical Molecular Morphology Award for Promoting Young Researchers in 2012. Dr. Kajihara is recognized for his contribution in explaining the role of FOXO proteins as a critical regulator of progesterone-dependent differentiation, menstrual shedding, and maternal protection of the feto-maternal conceptus against oxidative damage during pregnancy.
