Erratum: Rainfall and irrigation controls on groundwater rise and salinity risk in the Ord River irrigation area, northern Australia

Anthony J. Smith

**Erratum to: Hydrogeology Journal (2008),
16:1159–1175
DOI 10.1007/s10040-008-0301-6**

The rainfall amount for wet season 1982–1983 in Fig. 4b should be 0.72 m rather than 1.63 m as plotted. The corrected version of Fig. 4 is presented here. This error affects two rainfall values provided in the text on page 1162. In the first paragraph of the *Climate* section, the second sentence should read “Average annual wet-season rainfall (calculated as total annual rainfall from July to June) from 1960–1961 to 2004–2005 was 0.78 m/year...”. This value is slightly less than 0.8 m/yr, which was the value stated in the original paper. The third sentence of the same paragraph should read “The maximum wet-season rainfall from 1960–1961 to 2004–2005 was 1.48 m in 1999–2000...”. Because of the error in the rainfall value reported in the paper, it was incorrectly stated that the wettest wet season was 1982–1983.

Fig. 4 Annual rainfall (wet season) at Kununurra Airport (Australian Bureau of Meteorology); (a) Cumulative annual wet season rainfall, (b) Cumulative deviation of annual rainfall from the mean (1960–61 to 2004–2005)
