Erratum to: Lasers Med Sci
DOI 10.1007/s10103-013-1265-x

The original version of this article, unfortunately, contained several mistakes.

In Abstract, the second sentence should be:

At 2 weeks after denervation, LLLT (wavelength: 660 nm, energy: 3 J) was applied to the right tibiae of 6 mice (LASER) for 5 days/week over 2 weeks by using a minimally invasive laser needle system (MILNS) which

consists of a 100 μm optical fiber in a fine needle (diameter, 130 μm).

In Minimally invasive LLLT of Materials and Methods, the seventh sentence should be:

The tibia was directly irradiated with the laser (660 nm, 10 mW) for 300 s (energy: 3 J).

In discussion, the last sentence should be:

Even if the bone was irradiated with a low-intensity laser (3 J of energy) for a short duration (300 s), an effective prevention of bone loss was achieved.
