Subsequent to the publication of the above paper it has been brought to our attention that the species epithet proposed for the taxon represented by strain NEAU-ycm1^T is not grammatically correct as “*Streptomyces polyrhachii*” should have been proposed as *Streptomyces polyrhachis*. We here propose the corrected name for the taxon represented by strain NEAU-ycm1^T.

Description of *Streptomyces polyrhachis* sp. nov.

Streptomyces polyrhachis (po.ly.rha'chis. N.L. gen. n. polyrhachis, of the insect *Polyrhachis vicina* Roger).

The description of the species is as given for “*Streptomyces polyrhachii*” in Yu et al. (2013) Antonie van Leeuwenhoek 104:1013–1019.

The type strain is NEAU-ycm1^T (=CGMCC 4.7094^T = DSM 42102^T).
