DOI 10.1007/s10482-013-0017-z**

Subsequent to the publication of the above paper it has been brought to our attention that the name proposed for the taxon represented by strain JLT2006^T is problematic for several reasons. Consequently we here propose a corrected name for the taxon represented by strain JLT2006^T, which we propose be renamed as *Corallincola platygyrae*.

The online version of the original article can be found under doi:[10.1007/s10482-013-0017-z](https://doi.org/10.1007/s10482-013-0017-z).

Description of *Corallincola* gen. nov.

Corallincola (Co.rall.in'co.la. L. neut. n. corallium coral; L. masc. n. incola, inhabitant; N.L. masc. n. *Corallincola*, inhabitant, dweller of coral).

The description of the genus is as given for *Coralslurrinella* in Li et al. (2013) Antonie van Leeuwenhoek 104:983–991.

The type species is *Corallincola platygyrae*.

Description of *Corallincola platygyrae*

Corallincola platygyrae (pla.ty.gy'rae. N.L. gen. n. platygyrae of the coral genus *Platygyra*).

The description of the species is as given for *Coralslurrinella hongkonensis* in Li et al. (2013) Antonie van Leeuwenhoek 104:983–991. The type strain is JLT2006^T (=JCM 18796^T = CGMCC 1.10992^T).
