R. Jefferson-Loveday and P. G. Tucker wish to acknowledge that code “B” in On the application of LES to seal geometries v.91, 4, 827–848 (2013) was substantially the NTS code written by Prof Strelets’ group [1].

The code was shared in 2002 with a verbal agreement to allow joint research into 2003, and the agreement extended to help a student complete his doctorate. The code was subsequently used without permission and over repeated objections by Prof. M. Strelets and Dr. P. Spalart.

The authors apologise unreservedly for their failure to include this acknowledgement in their paper.
