Schekman, R., Goldstein L., Rossant, J. (ed.): **Annual Review of Cell and Developmental Biology. Vol. 24.** - Annual Reviews Inc., Palo Alto 2007. 652 pp. ISBN 978-0-8243-3124-5

The readers of *Biologia Plantarum* will be mainly interested in the following reviews: Microtubule dynamics in cell division: exploring living cells with polarized light microscopy (S. Inoué), Auxin receptors and plant development: a new signalling paradigm (K. Mockaitis and M. Estelle), Systems approaches to identifying gene regulatory networks in plants (T.A. Lomg *et al.*), Prelude to a division (N. Bhalla and A.F. Dernburg), Polar targeting and endocytic recycling in auxin-dependent plant development (J. Kleine-Vehn and J. Friml) and Cell polarity signalling in *Arabidopsis* (Z. Yang). Other reviews covered in this volume: Replicative ageing in yeasts, Sister chromatid cohesion, Epigenetic of RNA genes, Evolution of placenta-specific

genes, Signalling between synapse and nucleus, Disulfide-linked proteins folding pathways, Molecular mechanism of presynaptic differentiation, Regulation of spermatogonial stem cell self-renewal in mammals, Unconventional protein transport in cell surfaces, Nectin and afadin, MHC class I assembly and loading, Lipid binding by CDI molecules, Evolution of coloration patterns, regulation of APC/C activators, Protein kinases, Animal regeneration, Immunological synapses and kinapses, and Dscam-mediated cell recognition regulates neural circuit formation.

All articles were written by the foremost experts in the field and are fully supplemented, searchable, and downloadable (see <http://cellbio.annualreviews.org>).

T. GICHNER (*Praha*)
