“We would like to thank A. Grachev and an anonymous reviewer for valuable comments. Special thanks go to Reto Stauffer, Markus Dabernig and Manuel Presser of the University of Innsbruck for their valuable advice and help in statistical analysis in Sect. 5. We are happy to acknowledge the contributions of students in the analysis of the turbulence data: René Schubert (University of Kiel) initially helped with part of the statistics leading to Fig. 2, and Masters’ students of the Alpine Meteorological Field course are thanked for their contribution to field campaign measurements that led to Fig. 5 and Sect. 4. The i-Box infrastructure has been established through funding of the University of Innsbruck. Financial support for this work from the Austrian Science Fund (FWF), under grant #P 26290-N26 is thankfully acknowledged. All data used herein are available from the authors.”
