Erratum to: Int J Cardiovasc Imaging DOI 10.1007/s10554-012-0132-3

The original publication of the article contains error in the Abstract section. The sentence starting with “We prospectively analyzed ...” should read as “We prospectively

analyzed patients (n = 448) with AMI and primary angioplasty, who underwent contrast-enhanced cardiac magnetic resonance (CMR) imaging on a 1.5 T scanner in median 5 [4, 6] days after the acute event. CMR scar size was measured 15 min after gadolinium injection.”

The online version of the original article can be found under doi:[10.1007/s10554-012-0132-3](https://doi.org/10.1007/s10554-012-0132-3).
