Erratum to: Conserv Genet DOI 10.1007/s10592-011-0181-5

The author's would like to make the following comment:

The sample classified as Aders' duiker was erroneously identified: while this sequence aligns with other duiker

species it does not align completely with any registered on the NCBI to date and thus must be described as a non-ascribed duiker species at this moment. We thank Andrew Bowkett for raising the issue.
