It is with great pleasure that we welcome Professor Jan Dirk Jansen as a co-managing editor for Computational Geosciences. Dr. Jansen is a professor at the Technical University of Delft and a consultant at Shell International Exploration and Production. Dr. Jansen's research focuses on systems theory for production optimization and reservoir management (Smart Wells and Smart Fields). He is considered one of the world leaders in closed loop reservoir manage-

ment. He has authored or coauthored over 60 papers for international conferences and journals. He is a recipient of the gold award for the best R&D publication in the open literature issued by Koninklijke/Shell Exploration and Production Laboratory.

Dr. Jansen's expertise, experience, and enthusiasm will contribute to a broader vision of the journal in optimization and control and realistic engineering problems.
