With this issue, we announce a change in the editorship of *Computational Geosciences*. Prof. Jan-Dirk Jansen is stepping down as one of the Editors-in-Chief, after serving in this capacity since 2009. Prof. Jansen has provided outstanding leadership, and during his tenure, the journal has grown in quality and stature. The Editors-in-Chief and the members of the editorial board want to heartily thank Prof. Jansen for his service, and we are happy that he has agreed to stay on the editorial board as an associate editor in the new editorial board structure as per 2014.

We also announce that Prof. Ivan Yotov has agreed to take Prof. Jansen's place as one of the Editors-in-Chief.

Prof. Yotov is a leader in the field of computational geosciences and is well known for his work in numerical methods for partial differential equations, with applications to porous media flow and transport. He has been a member of the editorial board and has contributed greatly to the journal for many years. We welcome Prof. Yotov and look forward to working with him.
