This special issue of Formal Methods in System Design is devoted to extended versions of selected papers from the 23rd annual Conference on Computer Aided Verification (CAV) held over July 14–20, 2011 in Snowbird, Utah, USA. This special issue contains six papers that we selected with the help of the program committee and were considered to be among the best papers accepted to CAV 2011. They also represent the breadth of areas of interest to the CAV conference. This issue also includes the CAV 2011 Award announcement.

We would like to thank all the reviewers for their detailed reports and comments, the authors for their contributions, and the Springer Journals Editorial Office Staff for their prompt help with the preparation of this special issue.
