Fig. 1 Haplotype diversity in *S. s. gallaica* and *S. s. crespoid* (size of slices represent proportion of haplotypes indicated by number), and locality groups as defined in Table 1. Dark gray indicates *S. s. gallaica* and light gray *S. s. crespoid* according to the known distribution of the two subspecies of salamander existing in Portugal (Almeida et al. 2004)
