Erratum to: Genetica DOI 10.1007/s10709-012-9633-1

The original article has been published with typographical errors in the results section and the corresponding Tables. The true percentage of variation (% var) explained by the village * landrace factor for the number of days between

sowing and flowering of both main and last tillers is 2.3 % and 3 %, respectively, rather than 7.4 and 6 % as in the published article.

Additionally, the correct values of the degree of freedom (*df*) for the error terms in Table 8 should read as 286 for the Type I samples and 285 for the Type II samples.

The online version of the original article can be found under doi:
[10.1007/s10709-012-9633-1](https://doi.org/10.1007/s10709-012-9633-1).
