Erratum to: Geom Dedicata (2009) 138:99–115 DOI 10.1007/s10711-008-9301-x

This erratum indicates some of the typos and forgotten mathematical characters in our previously published paper in Geometriae Dedicata (2009) 138:99–115.

1. The first piece of equation on page 102 at line 8 should be replaced by $M = [-\cosh \Psi_{ij}]_{i,j=1,\dots,4}$ and it should have equal ($=$) sign between $[-\cosh \Psi_{ij}]_{i,j=1,\dots,4}$ and matrix. The expression at the end of page 106 should have equal ($=$) sign between $[\cos \Psi_{ij}]_{i,j=1,\dots,4}$ and matrix.
2. The argument $d\Psi_{ij}$ presented in Eq. 2 on p. 103 and in the last equation on p. 107 has to be removed. And the argument $d\Psi_{12}$ should also be removed in Eq. 12 on p. 105.
3. The expression in Theorem 4.2 (iii) given at line 11 on p. 107, should be replaced by $\frac{\sin \Psi_{ij}}{\sin \theta_{kl}}$. The expression in Theorem 4.3 given at line 17 on p. 107 should be replaced by $\frac{\sin \Psi_{12} \sin \Psi_{34}}{\sin \theta_{12} \sin \theta_{34}} = \frac{\sin \Psi_{13} \sin \Psi_{24}}{\sin \theta_{13} \sin \theta_{24}} = \frac{\sin \Psi_{14} \sin \Psi_{23}}{\sin \theta_{14} \sin \theta_{23}} = \frac{\sqrt{P}}{\det M}$.

All of the typos given above do not effect the rest of the paper.

The online version of the original article can be found under doi:[10.1007/s10711-008-9301-x](https://doi.org/10.1007/s10711-008-9301-x).
