Erratum to: Health Serv Outcomes Res Method (2009) 9:69–83 DOI 10.1007/s10742-009-0047-1

Unfortunately, in the article “Using the Census Bureau’s surname list to improve estimates of race/ethnicity and associated disparities”, Health Serv Outcomes Res Method, Table 7 has been incorrectly published in Vol. 9/Iss. 2; page 80.

The corrected Table 7 is presented below:

The online version of the original article can be found under doi:[10.1007/s10742-009-0047-1](https://doi.org/10.1007/s10742-009-0047-1).

Table 7 Formula for correcting BISG for insurance selection, based on multinomial logistic regression predicting self-reported race/ethnicity from BISG predicted probabilities ($n = 1,921,133$)

To obtain this corrected BISG predicted probability	Start with:	Add BISG predicted probability of Hispanic times this:	Add BISG predicted probability of Asian times this:	Add BISG predicted probability of Black times this:	Add BISG predicted probability of AI/AN times this:	Add BISG predicted probability of multiracial times this:	To get the sum	The corrected BISG prediction is
Hispanic	-4.5350	7.1409	3.3573	2.4090	2.0903	5.5008	X_{Hisp}	$\frac{e^{X_{\text{Hisp}}}}{1 + e^{X_{\text{Hisp}}} + e^{X_{\text{Asian}}} + e^{X_{\text{Black}}} + e^{X_{\text{AI/AN}}} + e^{X_{\text{Multi}}}}$
Asian	-4.6648	3.3532	8.3992	2.3034	2.5493	6.7947	X_{Asian}	$\frac{e^{X_{\text{Asian}}}}{1 + e^{X_{\text{Hisp}}} + e^{X_{\text{Asian}}} + e^{X_{\text{Black}}} + e^{X_{\text{AI/AN}}} + e^{X_{\text{Multi}}}}$
Black	-3.9763	1.6087	2.1258	7.0715	0.7633	6.9253	X_{Black}	$\frac{e^{X_{\text{Black}}}}{1 + e^{X_{\text{Hisp}}} + e^{X_{\text{Asian}}} + e^{X_{\text{Black}}} + e^{X_{\text{AI/AN}}} + e^{X_{\text{Multi}}}}$
AI/AN	-5.8592	2.5273	2.4654	2.0913	8.1850	6.6388	$X_{\text{AI/AN}}$	$\frac{e^{X_{\text{AI/AN}}}}{1 + e^{X_{\text{Hisp}}} + e^{X_{\text{Asian}}} + e^{X_{\text{Black}}} + e^{X_{\text{AI/AN}}} + e^{X_{\text{Multi}}}}$
Multiracial	-7.0198	0.8336	4.2897	2.8809	5.4224	7.0880	X_{Multi}	$\frac{e^{X_{\text{Multi}}}}{1 + e^{X_{\text{Hisp}}} + e^{X_{\text{Asian}}} + e^{X_{\text{Black}}} + e^{X_{\text{AI/AN}}} + e^{X_{\text{Multi}}}}$
White/other	1-the sum of the other five corrected BISG predictions
