Erratum to: Hydrobiologia DOI 10.1007/s10750-017-3296-y

The authors wish to correct several unfortunate errors in the aforementioned article. Two sentences in the Results section incorrectly list several values (values listed in tables are correct). Silver Carp 1-, 2-, and 3-year total ranges are 16.5, 53.6, and 74.2 km in size respectively, as listed in Table 1 of the published article. The mean location of Silver Carp annual total ranges are at river kilometer (rkm) 506.6 in 2012 and at rkm 509.2 in 2013. Mean location of 2011 annual total ranges are correctly listed in the article and values for these location home ranges are correctly listed in Table 2 of the original publication.

The results of the Chi squared analysis examining the use of different substrate types is incorrectly characterized in the results section. Silver Carp occurred most often over gravel.

The authors also wish to clarify one sentence in the Results section. The sizes of annual total ranges and annual home ranges at the 95% isopleth for Silver Carp did not vary among years, therefore, mean values are listed in the article text but are not identified. Silver Carp mean annual total range and annual home range at the 95% isopleth across the three year study were 35.8 and 31.2 km respectively. Values for individual years are listed in Table 2 of the aforementioned article.

The online version of the original article can be found under doi:[10.1007/s10750-017-3296-y](https://doi.org/10.1007/s10750-017-3296-y).
