Erratum to: Int J Primatol (2012) 33(1): 282–283
DOI 10.1007/s10764-011-9548-1

Three errors in this paper have come to my attention since it was published: Leanne T. Nash's name is incorrectly spelled twice: in the title and in the first paragraph of the text.

The city of publication should read "New York" not "Heidelberg".

The correct information for the book is, therefore:

Anne M. Burrows & Leanne T. Nash (Eds): The Evolution of Exudativory in Primates. Developments in Primatology: Progress and Prospects (Series Editor R. H. Tuttle).

Springer, New York, 2010. xxii + 303 pp.

ISBN 978–1–4419–6660–5 (USD \$179.00/EUR 129.95, hardcover)

The first paragraph should read:

What are the "advances and remaining sticky issues" (Nash & Burrows, chapter 1) in the research on primate exudate feeding? This is the key theme of a book edited by Anne M. Burrows and Leanne T. Nash, which is based on a symposium held at the 22nd Congress of the International Primatological Society in Edinburgh in 2008. Not surprisingly the reference line for all authors of the 14 chapters is Nash's review from 1986, in which she summarized more than 20 years ago dietary, behavioural and morphological correlates of exudativory in strepsirrhine and callitrichid primates.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s10764-011-9548-1>.
