The authors would like to note an error in the method section of this paper. The error is on page 487 in the description of the ages of the children in the study. At T2 and T3 the children's mean ages were 31 months (SD=6.5, range=19–44), and 36 months (SD=6.4, range=24–49) respectively, and not 36 months (SD=6.5, range=26–49) and 39 months (SD=6.5, range=27–51), as originally described in the paper. For T4, the mean age of the children was correct (42 months), but the standard deviation was 6.3, and the range was 30–55 months (rather than SD=6.5, range = 40–55). This error has no implications for the analysis of the reported results, as the loadings of the T2 and T3 assessments in the growth curves were freely estimated to allow for non-linearity of change.
